PROFESSIONAL SUMMARY

Embedded Software Engineer with experience in Automotive Battery Management System (BMS) development using Embedded C on the Renesas RH850 platform. Skilled in CAN communication, diagnostics, software integration, debugging, and validation using CANoe, CANalyzer, CS+, and E1 Debugger. Experienced in requirement analysis, defect resolution, technical documentation, and supporting customer deliverables in an Agile environment.

CORE COMPETENCIES

- Embedded C/C++
- Automotive Software
- Battery Management
- CAN Communication
- ECU Integration
- Renesas RH850
- Firmware Development
- AUTOSAR (basics)

WORK EXPERIENCE

Robosoft Technologies **Oct 2025 – Present**

Software Engineer *Bangalore*

- Designed, implemented and integrated Embedded C software modules for Automotive Battery Management System (BMS) on Renesas RH850 microcontroller.
- Analyzed customer requirements and functional specifications, implemented BMS features, and supported software integration and validation.
- Developed CAN communication software including CAN Driver, CAN Application, Diagnostics, Thermal Management, Task Monitoring and Fail-Safe mechanisms.
- Performed CAN Tx/Rx analysis, signal validation, debugging, and diagnostic testing using CANoe, CANalyzer, CS+, and E1 Debugger.

Robosoft Technologies **Sept 2024 – Sept 2025**

AI/ML Engineer *Bangalore*

- Contributed to ADAS data engineering by creating and validating annotated datasets for autonomous driving applications.
- Performed dataset quality validation, annotation consistency checks, and defect resolution to improve training data quality.
- Worked closely with engineering and quality teams to support AI model development for object detection, lane tracking, and collision avoidance.

TECHNICAL SKILLS

Programming	: Embedded C, C++, CAPL
Automotive Domain	: Battery Management System (BMS), CAN Application,Diagnostics, Thermal Management, ECU validation State Machine
Microcontroller	: Renesas RH850
Development Tools	: CANoe, CANalyzer, CS+, E1 Debugger
Software Engineering	: Requirement Analysis, Functional Specification Analysis, Software Integration,Debugging, Root Cause Analysis, Verification & Validation, Technical Documentation

PROJECTS

BMS Software Development | *Embedded C, RH850, CANoe, CANalyzer, CS+, E1 Debugger* **Oct 2025 – Present**

- Developed and integrated Embedded C software for Battery Management System (BMS) features including thermal management, CAN communication, diagnostic algorithms, and fail-safe mechanisms on the Renesas RH850 microcontroller.
- Executed CAN Tx/Rx integration, DBC signal validation, ECU software debugging, and target-level verification using CANoe, CANalyzer, CS+, and E1 Debugger by correlating CAN messages with internal variables and runtime execution.
- Performed requirement analysis, software implementation, defect debugging, root cause analysis, verification, and technical documentation to support software integration and customer deliverables.
- Performed testing and validation using Vector CANalyzer and RH850 debugger.

CERTIFICATIONS

Skill-Lync [View Certificates]

- Adaptive AUTOSAR
- Classic AUTOSAR
- Software Defined Vehicle (SDV) Foundations
- Software Defined Vehicle (SDV) Advanced
- Cloud Native Microservices CI/CD
- Continuous Testing of CAN Stack using Virtual ECUs on AWS

MathWorks [View Certificates]

- MATLAB Onramp
- Simulink Onramp
- Control Design Onramp with Simulink

EDUCATION

National Institute Of Technology Agartala(2024) **Tripura**
Bachelor of Technology in Electronics and Communication *CGPA : 8.07*

Tirumala Junior College(2020) **Rajahmundry**
Board Of Intermediate Education *CGPA : 9.77*

AWARDS and RECOGNITION

Robosoft Technologies **2024 – Present**
*Six Internal Kudos Badges **[View]*** *Bangalore, India*

- Received Six organizational recognition awards (3× Great Job, 2× Thank you, 1× Going above and beyond) for technical contributions, innovationb and consistent project performance.
- Recognized for technical ownership, problem-solving, mentoring, knowledge sharing, cross-functional collaboration, timely project delivery, and customer-centric contributions.

ACHIEVEMENTS

∗ Solved 200+ problems on LeetCode.
∗ Achieved 250+ coding score on GeeksforGeeks.
∗ Qualified National Olympiad SIMO (2018).
